PrimeScope Urban Flow Consults

Urban Intelligence for Sustainable Development

Urban Planning · Infrastructure · Data & BI · IT · Project Consultancy

CAPABILITY STATEMENT 2026

PrimeScope Urban Flow Consults is a Lagos-based multidisciplinary consultancy that combines urban planning, spatial intelligence, data engineering, specialist business intelligence, IT consultancy, transport, environmental and project expertise in one accountable team. We help public and private organisations plan, measure and deliver with confidence.

CORE CAPABILITIES

URBAN & INFRASTRUCTURE PLANNING

- Urban, regional, land-use and master planning
- GIS mapping, spatial analysis and geodatabases
- Transport and mobility studies; traffic surveys
- Neighbourhood, housing and infrastructure planning
- Environmental baselines and EIA support

DATA & BUSINESS INTELLIGENCE

- Data collection, cleaning and validation
- Databases, ETL/ELT pipelines and warehousing
- Power BI and Tableau dashboards
- KPI frameworks and performance reporting
- Specialist BI: strategy, governance and health checks

IT CONSULTANCY

- IT strategy and digital transformation
- Systems selection and implementation
- Microsoft 365 and cloud migration
- Network, device and user support
- IT security, backup and continuity

PROJECT & TECHNICAL CONSULTANCY

- Feasibility and project development support
- Scheduling, risk, budget and cost monitoring
- Monitoring and evaluation frameworks
- Stakeholder coordination and documentation
- Procurement and contract administration support

WHY PRIMESCOPE

- **Integrated team**: planning, data and IT, one evidence base
- **Registered leadership**: TOPREC-registered principals
- **Local and international**: Lagos field base, London data practice
- **Client-owned outputs**: documented, with training at handover
- **Clear boundaries**: licensed specialists lead statutory work

OUR DELIVERY METHOD

Eight stages from consultation to handover, each with a defined output and documented internal review before issue.
